

## Balance verification for the electricity supplier

Electricity suppliers in the Nordic market are facing an increasing volume of information and need more efficient ways of verifying correct invoicing and corresponding electricity procurement to customers. With Empower IM's service this can be achieved in a quick and flexible way, with changes in market processes implemented by us for all customers at once.

- **PRODUCT GROUP:** Energy market services
- **SERVICE TYPE:** Daily service, 5 days a week
- **ASSOCIATED SERVICES:** Balance management and settlement services, reporting services, energy trading services

### Operating environment

Typically, electricity suppliers have customers within several distribution networks. In such an operating environment, the management and verification of customer-specific measurement data are important tasks, along with ensuring that invoicing and electricity procurement are correct.

As a supplier, you need to ensure the predictability and correctness of your energy procurement by monitoring and verifying customer-specific measurement data against the corresponding data allocated to the supplier balance by settlement. Then you can avoid surprises when it comes to balance electricity volumes, as well as cumbersome financial corrections after the fact.

### Our service

Empower IM has extensive operating experience in the Nordic energy market. When you let us handle your balance verification, we receive your customer-specific hourly measurement, if available, data from network companies. We check this data and compare it to balance settlement sums. Your customer information system then receives hourly measurement data for invoicing purposes.

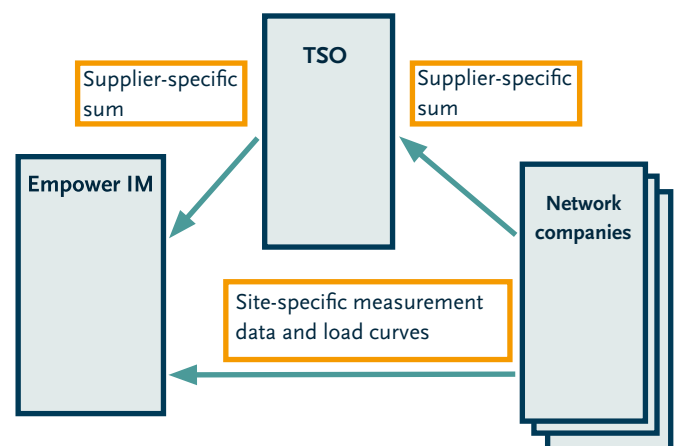

Our flexible service is implemented either using Empower IM's own system or a system that you already have in use. Usually the service includes an interface to your customer information system. We support various interface solutions. Typically, this service is a part of a larger service package. Empower IM services supporting balance verification include electricity consumption estimates, Elspot trading, balance settlement and various reporting services.

### Why choose Empower IM?

A lot is happening in the Nordic electricity market that entails stricter requirements on the data systems used and the balance verification process. As hourly measurement data becomes available, the information volume related to electricity sales is increasing and the quality

## Balance verification service

### Data exchange

of this information varies. Furthermore, as the different retail markets converge into common processes in the next few years, the operating area of retail electricity suppliers will grow significantly.

Using Empower IM's service will save you both time and money. For the verification and customer interface we use service systems where the modelling of balance information is quick and flexible regardless of market model. Principal changes to market processes can also be made available to many parties in the market at the same time.

With our extensive experience in various services for electricity suppliers Empower IM is sure to actively follow the development of the electricity market, quickly adapting our services according to new requirements.
